

NARENDAR LYAGALA

+91-6302311140 — narendarlyagala4@gmail.com — github.com/narendarlyagala4-ai — linkedin.com/in/narendar-lyagala

Professional Summary

Computer Science and Engineering student specializing in Artificial Intelligence and Machine Learning with hands-on experience in Generative AI, Machine Learning, Data Science, and Business Intelligence. Skilled in Python, SQL, RAG, data analytics, and developing AI-powered applications and interactive dashboards.

Education

JNTUH University College of Engineering <i>B.Tech in Computer Science and Engineering (AI & ML)</i> Intermediate	2023 – 2027 <i>CGPA: 7.65/10</i> <i>97.9%</i>
Secondary School	 <i>10 GPA</i>

Technical Skills

- **Programming:** Python, SQL
- **AI/ML:** Artificial Intelligence, Machine Learning, Generative AI, LLMs, RAG, NLP, Predictive Analytics
- **Data Science:** Data Analysis, ETL, Data Preprocessing, Data Visualization, Feature Engineering
- **Frameworks:** LangChain, FAISS, FastAPI, React, TypeScript, Scikit-learn
- **Tools & Databases:** Power BI, DAX, PostgreSQL, SQLAlchemy, Docker, REST APIs

Projects

SentinelAI – Enterprise Operations Copilot

- Developed an AI-powered enterprise platform using React, FastAPI, PostgreSQL, and TypeScript for unified enterprise operations and knowledge access.
- Integrated OpenAI and LangChain with RAG and FAISS vector search for contextual conversational querying across enterprise documents and data.
- Built REST APIs, authentication workflows, database integration, and Docker-based deployment using FastAPI, SQLAlchemy, and PostgreSQL.

E-Commerce Business Intelligence Dashboard

- Developed an end-to-end BI solution using Python ETL and SQL warehousing to transform raw e-commerce data into analytical datasets.
- Built Power BI data models and DAX measures to analyze sales, revenue, customer behavior, product performance, and business KPIs.
- Created a six-page interactive dashboard with dynamic visualizations and actionable insights for data-driven decisions.

AI-Powered Customer Churn Prediction System

- Developed a machine learning system using Python to predict customer churn from demographic, behavioral, and transaction data.
- Performed data preprocessing, exploratory analysis, feature engineering, and class-imbalance handling using Pandas and Scikit-learn.
- Evaluated classification models using Accuracy, Precision, Recall, F1-score, and ROC-AUC metrics.

Certifications

- **Data Analytics Virtual Experience Program** – Deloitte, Forage
- **Advanced Program in Emerging Technologies** – Code Unnati Initiative, SAP, implemented by Edunet Foundation
- **Data Science Job Simulation** – British Airways, Forage
- **GenAI Powered Data Analytics Job Simulation** – Tata, Forage
- **Data Visualisation: Empowering Business with Effective Insights** – Tata, Forage
- **National Level Workshop on Generative AI & Data Science–2026** – JNTUH University College of Engineering Manthani
